It was not long before the Americans made their approximace, they did not perceive us at first, hid as we were by the undergrowth, but we soon let them know where we were by pourng in one or two volleys as they were forming into line to oppose the British. They laltered a little, but very soon we perceived a large body of horse (Col. Johnson's regiment of mounted Kentuckians) preparing to charge upon us in the swamp. CANADIAN AFFAIRS .--

The tone of the New York city press upon the subject of Canadian affairs, affords a strikng proof of what must long wince have become obvious to every observing man, that is to say, of the little sympathy which there is between the feelings and sentiments of that great come door. mercial metropolist, and the feelings and centimendated the more of - but walliers without & & fact, by the way, which will write to explain the very slight influence which the press, or the public dubunt of that city, estile Juil country at large.

New York in train, is but a sort of foreign settlement; and its sympathies seem to be much more with foreign countries, or with the extreme states of the south, than with the popula-

tion by which it is immediately surrounded. Upon the authors of Canadian affairs, that the New York journals should be anxious for the preservation of our neutrality, is highly-proper; but that all those who feel for the oppressed Canadians should be stigmatized, under the name of sympathizers, as though it were a crune to sympathize with men, uneasy, and reslive under a foreign yoke, that the whole weight of the New York press, should be thrown into the British scale, and that the New York. city papers should-become the-ardent advocates of the British domination in Canada, and should attempt to humbug the good people of the United States with the bug bear of a British war, this course of proceeding scens to reflect no great honor either upon the feelings or the judg uent of those journals that pursue it.

As to a British war, it is known to every body, that even as things are, the pritish government is very much in doubt whether the Canadas are worth the expense of keeping. Throw a war with the United States into the scale, and the question would very soon be decided.

It stems to be pretty generally agreed, that things in the Canadas have come to such a para, that the British domination can only be sustain ed there, by catablishing, in place of the partial-ly free institutions that have hitherto prevailed, a pure military dayselfs To empose that the Ganadians, accustomed in some measure to liberty, and with the institutions of the United States in full contrast before their eyes, will remain quiet under a military despotism, is shourd; and it is equally absord, for these persons who An American Lapy, Miss Charlotte Mitch- for ten years past, have been preaching a sort of crusade, and levying contributions in favor of Greece and Poland, it is absord we say, for by the spirit they have contributed to raise ; or prevent a quantity of hairbrained young men, indoctrinated with their former lessons, from risking their neaks, for the sake of the Canad-[Bc-ton Atian.
